

POLICY OF ENERGY MANAGEMENT SYSTEM

Birinci Otomotiv, carries out activities for the purpose of reducing to use of natural resource and energy consumption within the scope of environmental management system and sustainability. Our aimed to work in accordance with the requirements in line with these targets by using projects and methods that will reduce energy costs and increase efficiency. The "Energy Management System" covers all employees and the main goals of the system is continuous improvement, based on the energy performance, savings and efficiency of all processes.

Birinci Otomotiv endeavor to use natural resources efficiently, reduce production costs and increase long-term environmental and economic sustainability. In order to reach the targets:

- We will make continuous improvements with developing technologies based on "Energy Efficiency" in all processes of our activities.,
- We will provide the necessary information and resources to achieve our goals and objectives,
- We will comply with the applicable legal conditions and other requirements regarding energy use, consumption and efficiency,
- We will increase the awareness of energy efficiency and resource use with the training to be given to our employees.,
- We will support the energy efficient products and services and design activities which will improve our energy performance,
- We are committed to increasing our energy performance every year with continuous improvement activities.
